Art Unit: 3634

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Nelson 3,187,902. Note plastic tool storage unit comprising a back plate 36, top plate 30, arcuate rebates 32 having downwardly extending reinforcing ribs, circular apertures 32a, gussets 38, pins 34 projecting from top plate.

Claim 6 is allowable.

Applicant's remarks have been carefully considered. Newly presented claim 6 with the limitation of some of the arcuate rebates facing towards the back plate and some of the arcuate rebates facing away from the plate distinguish from the prior art of record. If applicant wishes to amend claim 1 such that the circular apertures are not recited but the arcuate rebates facing away from and towards the back plate are recited, then all of the claims can be allowed in this application and this is the suggestion of the examiner. Claim 6 would then be applicant's broadest claim. Claim 1 would be somewhat more narrow. Additionally, if applicant wishes, the limitation of circular apertures could then be added to one of the claims depending from claim 1.

Otherwise, the rejection to claims 1-5 will stand as before.
